ThinkVision Docking Monitors

Experience revolutionary connectivity

Research tells us that Modern employees switch between tasks **300** times* per day. To get it all done in time, one device just won't cut it anymore. **52%** of workers use **three or more devices** to perform their job**. Managing all of this and staying productive is a big challenge. ThinkVision docking Monitors provide a smart display solution that empowers today's workforce.

What is a Lenovo ThinkVision Docking Monitor?

It's more than just a marvelous display. When connected, the monitor acts as an effective docking solution for ports that can connect to a full range of compatible peripherals, such as keyboards, laptops, smartphones[1], speakers, printers, cameras for conferencing, and external storage, simultaneously.

USB-C docking Monitors are based on the leading USB Type-C® technology[2] that has an improved bandwidth, can deliver a simple and practical way to carry different signals, like USB data, video, audio, network and power via one cable, without compromising on the quality. So, connecting to a full range of devices while maintaining a clear desk would be a breeze.

ThinkVision USB-C Monitors enable safer network connection via Ethernet as well as daisy-chaining capability that gives you a seamless multi-screen set-up.[4]

Lenovo, being the pioneer in the full-function USB-C monitor market, has unparalleled experience in this domain and we pride ourselves on our ability to constantly innovate. Designed to follow our world-renowned Think quality, these monitors are built to last. And, as we are a brand that specializes in multiple devices, our monitors have incomparable compatibility, making them an excellent choice to satisfy your multiple needs.
Docking Monitors can upgrade your workspace

Versatile monitors

If you have a laptop or a notebook with limited ports, USB-C Hub Monitors give you a better port selection. For notebooks that only have USB-C ports, USB-C docking Monitors are the perfect companion.

Enjoy wide compatibility without restrictions; Lenovo or not, compatible devices can be connected to the ThinkVision docking Monitors. Users can get the most out of devices[3] that help them to work—from laptops, keyboards, mouses, and smartphones[1] to printers and external storage. Connect all your devices to the USB-C docking Monitor and build a tailor-made desktop ecosystem.

ThinkVision docking Monitors can be connected via daisy-chain, combining two or even four monitors, expanding your display for a seamless multitasking experience.

The impressive USB-C port connectivity extends to Ethernet networks as well through an RJ45 adapter. Enjoy high-speed and more secure connections, more stable internet, and remote IT manageability.

Type-C

ThinkVision

1 Video transfer requires a phone with this capability. 2 USB Type-C® and USB-C® are registered trademarks of USB Implementers Forum. 3 Functions with devices that support industry standard USB Type-C Alt-Mode or Thunderbolt protocols through their_Type-C port. Performance reduced when not used with matching protocol. 4 For selected ThinkVision monitors.

Docking Monitors can upgrade your workspace

Make your work life easier

Tidy workplace. tangles of long wires and bulky adaptors will be the history, ThinkVision docking Monitors bring the one-cable solution, with only one cable, you could carry USB data, video and audio signals, and power for different needs and purposes, finally achieving a clutter free desk.

Always ready. The days of only working at one desk are gone. The modern workforce is always on the move, bouncing between desks, meetings, and couches—often in a hurry. Connect your keyboard, mouse, or any other compatible device[3] to the USB-C Hub Monitor, and you do not need to unplug them individually if you need to run to a meeting in another room; leaving your desk is now a much quicker endeavor.

Easy to use, the two-way symmetrical USB-C means you never have to fumble to plug it in the right way again.

Don't waste time looking for the right ports on your notebook or bending over the CPU under your desk. Ports are always easy to reach with USB-C Hub Monitors, by connecting devices to your monitor in one simple step.

Docking Monitors can upgrade your workspace

Smarter savings

No need for power adapters anymore! The USB-C docking Monitors provide 65W to 90W of power to charge your mobile devices.[3] Focus on your tasks instead of the frustration of searching for compatible adapters.

Lenovo's innovative Smart Power Technology can dynamically control the power supply and optimizes power consumption for efficient energy usage.

Save on cable purchases too, as just one cable can do the job thanks to the USB-C docking Monitor.

Lenovo

Standalone DOCK and Docking MONITOR:

Think Docking Station and Docking Monitor offer:
1. Managability 2. Flexibility 3. Clean Workspace 4. Easy Access

Standalone Docking

Solution FOR Customers

1. Requiring more extended connectivity (+ 4X USB-A ports, + 2X HDMI and + 1 DP out).
2. Extend the capability of current monitor set up without replacing existing monitor (enabling daisy chain for monitors not supporting DP out.
3. Best flexibility, for usage with any mix of monitors.

Docking Monitor

Solution FOR Customers

1. Want to up-grade monitor bigger size and higher resolution at the same time considering to replace existing docking stations.
2. Considering to replace existing docking stations and monitors but want to reduce the total cost of ownership.
3. 4X USB-A ports, 2XHDMI and 1X DP out is enough in addition to USB-C and Ethernet.
4. Reduces number of devices within the workspace.

THE RIGHT EXPANSION SOLUTION TO FIT THE FLEXIBLE WORKPLACE
